Assalamualaikum

Honorable Shareholders,

It is an honor and a privilege for me to present the Annual Report for the year 2017. It was a challenging year for the Bank. I at a personal level and on behalf of the Board of AB Bank, take this opportunity to express our heartfelt thanks and gratitude to our honorable shareholders for your cooperation and thoughtful understanding about the challenging business position of the Bank.

In global perspective, overall economic activity is strengthening. Global growth, which in 2016 was the weakest since the global financial crisis at 3.2 percent, was projected to rise to 3.6 percent in 2017 and to 3.7 percent in 2018. China's growth is likely to ease moderately as it continues to rebalance towards consumption from investment. It is expected that growth in the US and euro area to exceed 10-year averages, although this is not a particularly high bar. It is a distant probability that global

সযোগ পেয়ে আমি সম্মানিত বোধ করছি। আপনারা জানেন, ব্যাংকের জন্য বছরটি ছিল চ্যালেঞ্জের। আমি ব্যক্তিগতভাবে এবং এবি ব্যাংকের পরিচালনা পর্ষদ সদস্যদের পক্ষ থেকে সম্মানিত শেয়ারহোল্ডারবৃন্দকে জানাচ্ছি বিশেষ কৃতজ্ঞতা। ব্যাংকের উদ্ভূত পরিস্থিতিতে আপনাদের সহযোগিতা ও সহনশীলতার জন্য আন্তরিক ধন্যবাদ জ্ঞাপন করছি।

বিশ্বব্যাপী আর্থিক সংকটের কারণে বিশ্ব অর্থনৈতিক প্রবৃদ্ধি ২০১৬ সালে কমে দাঁড়িয়েছিল ৩ দশমিক ২ শতাংশে। সেখান থেকে বেরিয়ে ২০১৭ সালে ৩ দশমিক ৬ ও ২০১৮ সালে প্রবৃদ্ধির লক্ষ্য ধরা হয়েছে ৩ দশমিক ৭ শতাংশে। জীবনযাত্রার ব্যায় ও বিনিয়োগের পুণঃভারসাম্য প্রতিষ্ঠার কারণে চীনের প্রবন্ধিও তুলনামূলক ইতিবাচক ধারায় রয়েছে। একই ভাবে যুক্তরাষ্ট্র এবং ইউরো অঞ্চলের প্রবৃদ্ধিও গত দশ বছরের গড় হিসাব করলে তার চেয়ে বেশি হবে বলে প্রত্যাশা করা হচ্ছে।

AB Bank Limited Message from the Chairman

growth will recover to the 4.2% pre-global financial crisis average. Fiscal policy has turned mildly supportive of world growth, while monetary policy in general is likely to shift from ultra-accommodative to more neutral as inflation rises but remains well below longer-term averages.

Despite a strong near term view on global growth, long-term structural issues will continue to weigh: Ageing populations, weak productivity (despite rapid technological advances), soft wage growth, and prior leverage excesses.

On the commodities front, the supply-demand balance for oil in 2018 appears supportive of higher prices. We expect global oil demand to increase, with H2-2018 demand exceeding 100 million barrel per day. Consequently, it is expected oil prices to start a consolidation above USD 60/per barrel for Brent in 2018.

That trend — a consequence of rapid globalization - is under siege from political forces in the developed countries who ironically were the champions of free trade and globalization. Rising income inequality and skills mismatch in a period of digital transformation and open trade have led to significant joblessness in those countries giving rise to forces of protectionism and a new wave of economic nationalism.

For Bangladesh perspective, 2017 was a year of achievements and challenges as well. It was milestone of breaking six percent GDP cycle, where recorded growth was 7.28 percent. Though macro indicators are reflecting positive strengths, overall strength of the economy is weakening as number of mega developing projects like the Padma Bridge, Rooppur Nuclear Power project, Paira Sea Port, the coal fired large power projects of Matarbari and Rampal, Metro Rail and LNG terminal is going on. Average inflation has been around 5.5 percent where food inflation is showing an increasing rate because of agricultural loss due to two rounds of devastating flood. According to World Bank, Bangladesh continues to be one of the more attractive nations in the South-east Asia region in which to do business. However, poor infrastructure, inadequate energy supply, and inefficient financial intermediation combined with high cost of doing business remain the main obstacles hindering the realization of Bangladesh's vast economic potential.

Exports of Bangladesh grew marginally in FY2017, by 1.7%, down from 8.9% a year earlier. Garment exports grew by a scant 0.2%, down from 10.2% in FY2016. The slump reflected much weaker demand in major markets in the euro ফলে বিশ্ব প্রবৃদ্ধি দীর্ঘমেয়াদে আর্থিক মন্দার পূর্বাবস্থায় ফিরে গিয়ে ৪ দশমিক ২ শতাংশে যাওয়ার সম্ভাবনা দেখা দিয়েছে। আর্থিক নীতি কিছুটা প্রবৃদ্ধি সহায়ক হলেও সার্বিকভাবে এখন মূল্যক্ষীতি রোধে মুদ্রানীতির প্রভাব ক্রমান্বয়ে কমছে।

স্বল্প মেয়াদে বিশ্বপ্রবৃদ্ধির এই ইতিবাচক চিত্রসত্ত্বেও দীর্ঘমেয়াদি কিছু ইস্যু অব্যাহতভাবে সামনে চলে এসেছে, যেমন–জনসংখ্যার বার্ধক্য, দুর্বল উৎপাদনশীলতা (প্রযুক্তির ক্রমঅগ্রসরতার মধ্যেও), মজুরি বৃদ্ধি ও পূর্বেকার প্রভাব বলয়।

পণ্যবাজারের কথা চিন্তা করলে ২০১৮ সালে তেলের বাজারে সরবরাহ ও চাহিদার যে ভারসাম্যপূর্ণ অবস্থা তা উচ্চমূল্যের নির্দেশক। আমরা আশা করতে পারি যে, বিশ্বে জ্লালানি তেলের চাহিদা বাড়বে যা দৈনিক একশ' মিলিয়ন ব্যারেল ছাড়াবে। যুক্তিসঙ্গতভাবেই আলোচ্য বছরে ব্রেন্ট অয়েলের দাম ব্যারেল প্রতি ৬০ ডলার ছাড়িয়ে গেছে।

এই প্রবণতাটি দ্রুত বিশ্বায়নের পরিণতি– যা উন্নত দেশগুলোর রাজনৈতিক শক্তিগুলোর মাধ্যমেই উদ্ভব হয়। অথচ ঐসব দেশগুলোই মুক্তবাণিজ্য এবং বিশ্বায়নের বেশি সুবিধাভোগী। প্রযুক্তিগত রূপান্তরের এই কালে আয়- বৈষম্য বৃদ্ধি, দক্ষতার অসামঞ্জস্যতা এবং মুক্ত বাণিজ্য ঐ দেশগুলোতে উল্লেখযোগ্য পরিমানে বেকারত্ব সৃষ্টি করছে, যা সংরক্ষণবাদী এবং অর্থনৈতিক জাতীয়তাবাদের নতুন জাগরণের উদ্ভব ঘটাচ্ছে।

বাংলাদেশ প্রেক্ষাপটে ২০১৭ সাল ছিল অর্জনের এবং একই সাথে কোন কোন ক্ষেত্রে চ্যালেঞ্জেরও। প্রবৃদ্ধি অর্জনে ৬ শতাংশের বৃত্ত ভেঙে রেকর্ড ৭ দশমিক ২৮ শতাংশ অর্জনের বছর ছিল ২০১৭। সমষ্টিক অর্থনৈতিক সূচকগুলোর ইতিবাচক প্রতিফলন দেখা গেলেও অর্থনৈতিক শক্তি কিছুটা দুর্বল হয়েছে চলমান বড় বড় অবকাঠামো প্রকল্প ব্যয়ের কারণে, যেমন- পদ্মা সেতু, রূপপুর পারমানবিক বিদ্যুৎ কেন্দ্র, পায়রা সমুদ্র বন্দর, রামপাল ও মাতারবাড়ি কয়লাভিত্তিক বিদ্যুৎ কেন্দ্র, মেট্রো রেল ও এলএনজি টার্মিনাল প্রকল্প। পরপর দুটি বন্যায় ব্যাপক ফসলহানি ও কৃষিতে ক্ষয়ক্ষতি সাধিত হওয়ায় গড় মূল্যক্ষীতি ৫.৫ শতাংশের মধ্যে থাকলেও খাদ্যজনিত মুল্যক্ষীতি ছিল উর্ধ্বগতির দিকে। বিশ্বব্যাংকের মতে, দক্ষিণ পূর্ব এশিয়ায় বাংলাদেশ ব্যবসা ক্ষেত্রে ক্রমেই আকর্ষণীয় কেন্দ্রে পরিণত হলেও, দুর্বল অবকাঠামো, জ্বালানি সরবরাহে সংকট, ব্যবসা করার খরচ বেশি হওয়ার কারণে বাংলাদেশ তা পুরোপুরি অর্জন করতে পারছে না।

২০১৭ সালে বাংলাদেশের রফতানি মাত্র ১.৭ শতাংশ হারে বেড়েছে যা আগের বছরের তুলনায় ৮.৯ শতাংশ কম। গার্মেন্টস রফতানিও কমেছে। ২০১৬ সালের ১০.২ শতাংশ প্রবৃদ্ধির তুলনায় এখাতে ২০১৭ সালে রফতানি প্রবৃদ্ধি হয়েছে মাত্র ০.২ শতাংশ। যুক্তরাষ্ট্র ও ইউরোজোনে চাহিদা কমে যাওয়া

AB Bank Limited Message from the Chairman

area and the US, as well as an infrastructure deficit that kept exporters from filling some orders. Other exports grew rapidly at 8.5%. With stepped-up domestic demand, growth in import payments accelerated to 9.0% from 5.9%, reflecting solid increases in most categories: food, investment and consumer goods, and crude oil and petroleum products. Growth in intermediates for the garment industry, however, were modest.

Despite expanded employment overseas, worker remittances fell by 14.5% in FY2017. The decline mostly reflected economic adjustment to low oil prices in the Gulf, which hosts most Bangladeshi migrant workers that depressed employment and wages.

The current account fell into deficit in FY2017 by \$1.5 billion, equal to 0.6% of GDP, which reversed a surplus of \$4.3 billion in FY2016. The downturn reflected a \$3.0 billion widening of the trade deficit and a \$2.1 billion fall in remittances, as well as continued small deficits in the service and primary income accounts. The surplus in the combined capital and financial accounts nevertheless rose to \$4.5 billion, which lifted gross foreign exchange reserves in the central bank by \$3.2 billion to \$33.4 billion at the end of June 2017, providing nearly eight months of import cover.

The Bangladesh taka depreciated against the US dollar by 2.7% in nominal terms in the year to the end of June 2017. Taking into account differences in inflation, the taka appreciated by 2.4% in real effective terms, eroding competitiveness.

In this backdrop, in 2017, the banking sector exposed further weaknesses through major indicators such as rise of non-performing loans, lower capital adequacy and the overall instable scenario in the sector. The scenario of AB was no different. In most parameters Bank did not perform well, particularly in respect to asset quality, which forced the bank to make further provisions. Management and the Board are very conscious about the situation. Already Bank has procured BDT 400 crore Subordinated Bonds which has enhanced the capital base of the Bank in accordance with approval of Bangladesh Bank and Bangladesh Securities & Exchange Commission (BSEC). Rights issue approval is pending at BSEC's end.

In the end I would like to thank my colleagues of the Board, for their relentless guidance, support and the confidence they have bestowed upon my leadership. I would also like to এবং এর পাশাপাশি অবকাঠামোগত দুর্বলতার কারণে রফতানি আদেশ পরিপালনেও ব্যর্থ হয়েছেন রফতানিকারকরা। যদিও অন্যান্য খাতের রফতানি সাড়ে ৮ শতাংশ হারে বেড়েছে।

অভ্যন্তরীণ চাহিদা বৃদ্ধি পাওয়ায় আমদানি ব্যয়ের প্রবৃদ্ধি বেড়েছে ৯ শতাংশ, যা আগের বছর ছিল ৫.৯ শতাংশ। আলোচ্য সময়ে খাদ্য ও ভোগ্যপণ্য এবং জালানি তেলের আমদানি বেডেছে। পোশাক শিল্প সহায়ক পণ্য আমদানিতেও গতি ছিল।

অন্যদিকে বৈদেশিক কর্মসংস্থান বাড়লেও ২০১৬-১৭ অর্থবছরে প্রবাসীদের রেমিটেন্সের পরিমান কমেছে সাড়ে ১৪ শতাংশ। তেলের দাম কমে যাওয়ায় মধ্যপ্রাচ্যের দেশগুলোতে কর্মরত বাংলাদেশিদের সংখ্যা ও কাজের মজুরি কমে যাওয়াই এর অন্যতম কারণ।

চলতি হিসাবে ২০১৬ সালে ৪.৩ বিলিয়ন ডলার উদ্বন্ত নিয়ে বছর শুরু করলেও ২০১৭ সালে ঘাটতি দেখা দেয় দেড় বিলিয়ন ডলার, যা জিডিপির ০.৬ শতাংশ। যার ফলশ্রুতিতে দেশের বাণিজ্য ঘাটতি দাড়ায় ৩ বিলিয়ন ডলারে। একই সঙ্গে রেমিটেন্স কমেছে ২.১ বিলিয়ন ডলার। সেবা ও প্রাথমিক আয়ের হিসাবেও কিছুটা ঘাটতির সৃষ্টি হয়েছে। তবে বৈদেশিক মুদ্রার রিজার্ভ ছিল উদ্বন্ত, যা জুন ২০১৭ শেষে ৩৩.৪ বিলিয়ন ডলারে দাঁড়ায়, যা আট মাসের আমদানি ব্যয় মেটাতে সক্ষম।

জুন ২০১৭ অর্থবছর শেষে ডলারের বিপরীতে বাংলাদেশি টাকার মান কমে যায় ২.৭ শতাংশ। মূল্যস্ফীতির হার বাদ দিয়ে হিসাব করলে টাকার মান প্রকৃত বিনিময় হারে ২.৪ শতাংশ বেড়েছে।

২০১৭ সালের এই পরিস্থিতিতে, ব্যাংক খাতও দুর্বল হয়ে ওঠে এবং সার্বিক ভাবে ব্যাংকিং খাতে অস্থিরতা বিরাজ করে। এসময় বেডে যায় নন-পারফর্মিং লোন (এনপিএল), এবং পর্যাপ্ত পুঁজির প্রবাহে ভাটা দেখা দেয়। এবি ব্যাংকের ক্ষেত্রেও তার ব্যতিক্রম ছিল না। বিশেষত: এসেট কোয়ালিটি বা সম্পদের মান ধরে রাখা সম্ভব না হওয়ায় ব্যাংককে পুনরায় প্রভিশন বা সঞ্চিতি নিশ্চিত করতে হয়েছে। ব্যাংকের ব্যবস্থাপনা কর্ত্রপক্ষ এবং পরিচালনা পর্ষদ এ ব্যাপারে সচেতন আছে। ইতিমধ্যে ব্যাংক কেন্দ্রীয় ব্যাংক ও বাংলাদেশ সিকিউরিটিজ ও এক্সচেঞ্জ কমিশনের (বিএসইসি) অনুমতি নিয়ে ৪শ' কোটি টাকার সাব–অর্ডিনেটেড বন্ড ইস্যু করেছে, যা ব্যাংকের মূলধন বৃদ্ধিতে সহায়ক। রাইটস ইস্যর বিষয়টি বিএসইসির অনুমোদনের অপেক্ষায় রয়েছে।

পরিশেষে আমি পরিচালনা পর্ষদের সম্মানিত সদস্যদের ধন্যবাদ জানাতে চাই, তাদের গুরুত্বপূর্ণ দিকনির্দেশনা, সহযোগিতা ও আস্থা প্রদর্শনের জন্য। আমি একই সঙ্গে ধন্যবাদ জানাতে চাই উর্ধ্বতন ব্যবস্থাপনা কর্তৃপক্ষকে, তাদের নিরলস প্রচেষ্টা ও পরিস্থিতি মোকাবেলায় দৃঢ়তার জন্য।

AB Bank Limited Message from the Chairman

thank the senior management of the Bank for their dedication and determination in these trying circumstances. I also express my sincerest gratitude to all the regulatory bodies specially Bangladesh Bank for their support and quidance.

I thank the honorable shareholders of the Bank for their continued support and loyalty. I would like to end here with a word of caution that the coming year will be a challenging one for AB in many ways because of uncertainties of business, high cost of funds and constraints of the bank in undertaking large loan disbursement.

Let's all hope for a better 2018.

Thank you all.

Assalamualaikum

Being the first private sector bank in this country, AB Bank is now a household name, epitomizing the banking industry benchmark offering tailor-made services to its customers. In today's world, economic development of a country is not possible without the involvement of banks. Banks play a key role in the economy and the society as a whole. Initiatives taken by Banks and/or its partnership with entrepreneurs, contribute towards the economy, business environment, creation of job opportunities, technological innovations etc.

Bangladesh achieved one of the highest GDP growth rate in the South Asian region in 2017, which was 7.28% for FY2017, surpassing the target of 7.20%. The average growth rate for the past 10 years now stands at 6.26%.

The year 2017 was very critical for the Bank. We maintained an asset size of BDT 31,456 crore. Total

export was BDT 7,511 crore and total import was BDT 10,492 crore. However, due to the tightened guidelines and weak business sector-wise growth, it was very difficult to maintain asset quality. Our classified loan stood at BDT 1,640.88 crore as against last year's BDT 1,136 crore. Bank maintained required provisions as per requirement of Bangladesh Bank. Besides asset quality we faced various other challenges that slowed down our momentum. However, we have taken some measures to alleviate those challenges. We firmly believe that we will overcome these adversities and be back on track within a short time.

A culture has been set in AB to foster value-driven business rather than to run for profit only. AB's visionary policy has always been concentrated on expanding business horizon by making portfolio diversification. The ongoing construction of the much talked about Padma

AB Bank Limited Message from the President & Managing Director

Bridge, mega projects on power and energy, textile & RMG and pharmaceuticals and key backward linkages of the construction and real estate sectors epitomize Bangladesh's strong commitment to build a happy, prosperous and safe country. We also diversified our portfolio in large scale industries like power, food manufacturing, pharmaceuticals, ship breaking, printing, transports and many more.

AB believes in compliance and control and serious emphasis has been given on adherence and implementation of national and regulatory policies and guidelines. With this end in view our Core Banking System is being upgraded to reduce the possibility of human errors as well as to enhance systems driven controls.

AB offers a quintessential environment to implement banking solutions. The bank is committed to support new entrepreneurs to accelerate the innovative nature of their talent and build successful businesses. We are taking strides in providing tech-savvy services to our clientele, without losing sight of the human aspect of traditional banking. We expanded our alternative delivery channels by increasing the number of ATM Booths to 276, partnering with MasterCard and introduction of World MasterCard, Gold and Titanium credit cards, automated utility bill collections etc. We have focused more on SME and Consumer Banking in order to reach the common, unbanked population of the country as inclusive finance ecosystem is evolving to include not only financial service providers, both banks and non-banks, but new players, like mobile money providers and e-money operators. Besides we have also obtained license from Bangladesh Bank to open Agent Banking outlets throughout the country in order to increase our retail customer base. We will continue to explore and expand our networks and business at home and abroad.

AB firmly believes that as we grow, our responsibility towards the society grows too. AB therefore, invests quite a considerable amount of time and money towards Corporate Social Responsibility. Our first and foremost commitment is to contribute to the society for improving the lives of people, particularly the segment who are underprivileged and less fortunate in terms of basic needs. We have and will continue to remain alongside as sincere benefactor of the country's rich heritage of arts, culture and sports.

I believe the biggest asset of an institution is the skilled human resources. The quality of their output forms the basis of the institution's overall performance resulting in the goodwill and success. This year, we have invested substantially towards the professional development of our employees through imparting training, seminars and workshops held at home and abroad. The focus of training at AB in 2017 was not only to develop its experienced officers but also the Management Trainee Officers aiming to make them mission-critical for our institution. AB believes in diversity and therefore, we consciously employ talented, self-motivated and pro-active candidates from diverse backgrounds for ensuring creativity, innovation and value-addition in the banking industry.

In 2018, we have prioritized our focus on selective investments rather than wholesale growth. I believe we have taken up the right strategy and have the right people to identify, grasp and benefit from opportunities and cope with the adversity, created due to some unavoidable factors.

My sincerest thanks to our valued customers for their patronage, our shareholders and stakeholders for their continued support and trust in us, the regulators for their guidance and our Board of Directors for their pragmatic vision, valuable advice and leadership.

This April, AB Bank completed 36 years of successful journey of serving its valued customers. We are committed to making a greater endeavor and success in the years ahead with your unwavering support and patronage.

I am privileged and honored to lead a winning and mission-critical team of professionals. I thank all my team members for their strong commitment, dedication and continuous support. Together we as AB Family will thrive for a better tomorrow towards a virtuous business. arowth.

Thank you.

RISK MANAGEMENT REPORT

Introduction

In general, risk refers the possibility of occurring unexpected situation or deviation from the expected outcomes. It is an inherent part of any business operation. It may arise from internal faults or from external factors affecting adverse result in the said business or downgrading the image of the institution. Risk management is the deliberate acceptance of risk for profit-making. It requires informed decisions on the tradeoff between risk and reward, and uses various financial and other tools to maximize risk-adjusted returns within pre-established limits.

In banking industry, risk factors are generally exposed to its lending business, trade-service business and other operational activities. Banks need to meet forthcoming regulatory requirements for risk measurement and mitigation thereof by arrangement of capital and provisions. However, to meet the regulatory requirements is not enough. A sound and scientific risk management system should be there for regular monitoring, performance evaluation and corrective measures. Managing and mitigating such risks are always a prioritized concern of AB Bank Ltd.

DIRECTORS' REPORT

Bismillahir Rahmanir Rahim

Honorable Shareholders

Assalamualaikum.

It is a pleasure for the Board of Directors of AB Bank Limited to present the Directors' Report 2017. This report outlines the performance of the Bank for the year ended December 31, 2017. The Board of Directors has reviewed the financial statements to ensure effective financial controls, transparency and accuracy of the data and financial reporting of the Bank. The report deals with the Bank's overall performance and activities of 2017. The Directors' Report also contains a brief overview of the world economy alongside Bangladesh economy and Banking industry outlook of the country.

Dear Shareholders,

The Directors' Report 2017 is prepared in accordance with Section 184 of Companies Act, 1994 and Bangladesh Securities & Exchange Commission's Notification SEC/CMRRCD/2006-158/134/Admin/44 dated August 07, 2012. We are pleased to place the audited Financial Statements of the Bank for the year ended 31st December 2017 along with the Auditor's Report. Financial Statements of the Bank have been prepared with a view to provide maximum possible coverage in terms of compliance with applicable regulatory requirements and financial standards and to give a true and fair view of the business affairs in a transparent manner as far as possible to our Shareholders and regulators alike. All the subsidiaries and other independent activities of the Bank have been given separate representation in this year's Financial Statements.

Starting in 1982, today after 36 years, we are a compliant and a robust banking institution facing the challenges of the changing business environment - a testament to an enduring partnership with our Shareholders, Directors, Customers, Regulators and well-wishers. To honour and in recognition of the bondage, we have designed our 36th year mnemonic to read - "36 Years of Successful Partnership".

Dear Shareholders,

Global Economy

The global growth is expected at 3.9% in 2018, similar to 2017. China's growth is likely to ease moderately as it continues to rebalance towards consumption from investment. It is expected that the US and euro area growth will exceed 10-year averages, although this is not a particularly high bar. There is a slim possibility that global growth will recover to the 4.2% pre global financial crisis average. Fiscal policy has turned mildly supportive of world growth, while monetary policy in general is likely to shift from ultra-accommodative to more neutral as inflation rises but remains well below longer-term averages.

While the market is unwilling to price risk premium for now, this does not mean risks can be ignored. In addition to geopolitical and political risks (including many elections), we are watching three other key risk themes for 2018:

Global trade may not perform as strongly, as temporary factors that propped up 2017 exports are likely to fade. Asia, the region most open to trade, cannot count on the same degree of external support that it received in 2017. Two of the drivers of stronger exports in 2017 were temporary: the recovery in prices of exported goods (which followed commodity prices with a lag) and China's inventory restocking cycle. Stretched leverage cannot be ignored. High household leverage may weigh on growth in Malaysia, South Korea and Thailand. On the external debt front, the most vulnerable economies are Venezuela, Jordan, Argentina, Turkey and Greece.

Multiple political event risks could knock the markets, and global growth, off track. Today's political risks (US, Middle East, North Korea, UK and Europe) leave us almost as uncomfortable about the outlook as we were a year ago. In the markets, however, a positive see of change in risk sentiment is visible compared to one year ago.

Despite a strong near term view on global growth, long-term structural issues will continue to weigh: ageing populations, weak productivity (despite rapid technological advances), soft wage growth, and prior leverage excesses.

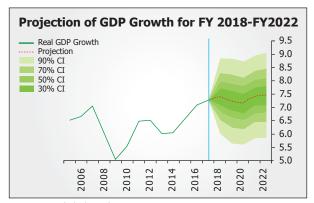

On the commodities front, the supply-demand balance for oil in 2018 appears supportive of higher prices. We expect global oil demand to increase in the 2nd half of 2018 exceeding 100mb/d resulting in increae of oil price from USD 60/bbl.

The medium-term growth outlook appears tentative and will depend in part on the new economic relationship within the EU (e.g. how Brexit plays out) and the extent of the barriers to trade, migration, and cross-border financial activity. IMF's October 2017 report on the global economy and outlook paints a modestly improved picture of the world economy in the current year and the next. Though global growth is not projected to reach pre-financial crisis levels the good news is that trade growth has finally started to exceed output growth. This phenomenon of trade growth exceeding income growth was the standard feature of the post-war global economy until the financial crisis of 2007-08 broke the trend. It was the signal that trade was the driving force behind post-war prosperity.

That trend — a consequence of rapid globalization - is under siege from political forces in the developed countries who ironically were the champions of free trade and globalization. Rising income inequality and skills mismatch in a period of digital transformation and open trade have led to unemployment in those countries giving rise to forces of protectionism and a new wave of economic nationalism.

Bangladesh Economy

GDP grew by 7.3% in fiscal year 2017 (FY2017, ended 30 June 2017), edging up from 7.1% a year earlier. This growth despite falling remittances was due to acceleration in private consumption expenditure, and continued growth in public

infrastructure investment. Private investment rose marginally. With faster expansion in import volume while exports stagnated, net exports subtracted from growth at \$1.7 billion, foreign direct investment equaled less than 1.0% of GDP.

On the supply side, agriculture grew by 3.0%, up from 2.8% the year before. Despite staple crop losses to heavy rain and prolonged flooding, good performance in other subsectors—horticulture, animal farming, forestry, and fishing—buoyed agricultural output overall. Industry growth slowed to 10.2% from 11.1% largely on weaker growth in medium and large-scale manufacturing as garment production stagnated. Services growth accelerated to 6.7% from 6.3%, mainly on higher growth in wholesale and retail trade and in transport services.

Despite food inflation trending higher during the year as weather induced rice shortages, average inflation decelerated to 5.4% from 5.9% as non-food inflation slowed. This reflected the conservative monetary policy of Bangladesh Bank, the central bank, and a stable exchange rate. Inflation rose to 5.9% year on year in June 2017, from 5.5% a year earlier, as food inflation accelerated to 7.5% from 4.2% and non-food inflation decelerated to 3.7% from 7.5%. Growth in broad money slowed in FY2017 to 10.9%, well below the monetary program target of 15.5% . The slowdown came mainly from a sharp decline in net credit to the government as it turned to borrowing more through the sale of national savings certificates. Private credit growth was close to its target of 16.5% as private investment picked up. Expansion in net foreign assets slowed on a smaller increase in central bank foreign exchange reserves.

The central bank kept its repo and reverse repo policy rates unchanged in FY2017, but ample liquidity in the banking system meant that interest rates continued to decline. The call money rate remained stable under easing liquidity pressure. The weighted average yield on 91-day Treasury bills declined to 3.7% in June 2017 from 4.0% a year earlier.

Source: Bangladesh Bureau of Statistics

Banks' weighted average lending rate eased to 9.6% from 10.3% in the same period, while the weighted average deposit rate declined to 4.8% from 5.4%, narrowing banks' interest rate spread by 0.2 percentage points to 4.7 points. Nonperforming loans in state-owned commercial banks continued to be a major issue as, despite remedial policies.

Budget revenue as a share of GDP remained very low at 10.2%, continuing to constrain a more rapid pace of development even as it rose slightly from 10.0% in the previous year. Tax collection by the National Board of Revenue grew by 19.0% in FY2017 but still fell short of the high budget target. Non-tax revenue collection was below target.

Expenditure was lower than the budget and declined to 13.2% of GDP from 13.8% a year earlier. Strengthened monitoring of public spending through a new integrated budget and accounting system helped moderate current spending, curb public spending as a share of GDP and make it more effective. The budget deficit declined to the equivalent of 3.0% of GDP in FY2017 from 3.8% in FY2016, well below the 5.0% budget target.

Exports grew marginally in FY2017, by 1.7%, down from 8.9% a year earlier. Garment exports grew by a scant 0.2%. The slump reflected much weaker demand in major markets in the euro area and the US, as well as an infrastructure deficit that kept exporters from filling some orders. Other exports grew rapidly at 8.5%.

With stepped-up domestic demand, growth in import payments accelerated to 9.0% from reflecting solid increases in most categories: food, investment and consumer goods, and crude oil and petroleum products. Growth in intermediates for the garment industry, however, were modest.

Despite expanded employment overseas, worker remittances fell by 14.5% in FY2017. The decline mostly reflected economic adjustment to low oil prices in the Gulf, which hosts most Bangladeshi migrant workers, that depressed wages and employment as well as remittances through reportedly unofficial channels.

The current account fell into deficit in FY2017 by \$1.5 billion, equal to 0.6% of GDP, which reversed a surplus of \$4.3 billion in FY2016. The downturn reflected a \$3.0 billion widening of the trade deficit and a \$2.1 billion fall in remittances, as well as continued small deficits in the service and primary income accounts. The surplus in the combined capital and financial accounts nevertheless rose to \$4.5 billion, which lifted gross foreign exchange reserves in the central bank by \$3.2 billion to \$33.4 billion at the end of June 2017, providing nearly 8 months of import cover.

The Bangladesh Taka depreciated against the US dollar by 2.7% in nominal terms in the year to the end of June 2017. Taking into account differences in inflation, the Taka appreciated by 2.4% in real effective terms, eroding competitiveness.

The country's capital market passed 2017 registering some records, including seven-year high turnover value, amid fluctuation observed in broad index and turnover value during the year.

The Dhaka Stock Exchange (DSE) registered the highest turnover in 2017 since the stock market debacle in 2010-11, riding on increased trade participation by the investors. The DSE featured a daily average turnover of more than Tk 8.75 billion, whereas the turnover during 2011-16 was between Tk 4.23 billion and Tk 6.64 billion.

The benchmark index of the Dhaka Stock Exchange DSEX posted 24 percent growth to more than 6,200 points in 2017. On November 26, the DSEX closed at 6,336 points, the highest ever mark since the introduction of new benchmark index.

The DSE also registered the highest ever market capitalization worth above Tk 4.26 trillion on November 23, 2017. However, the bench mark index of DSE has fallen at 5,406 on May 21, 2018, a down ward trend since the beginning May 2018.

Worker remittances rebounded to expand by 16.6% in the first 8 months of FY2018, reflected reduced bank fees and charges and a record number, in about a decade, of about 1 million workers that went abroad in 2017.

The Taka depreciated by 4.3% against the US dollar in late-2017 from the same period last year, and is expected to depreciate further in response to the large current account deficit. To avoid excessive volatility in the foreign exchange market, the central bank sold \$1.1 billion to meet demand for foreign currency in this period. By December 2017, the Taka had depreciated by 6.8% in real effective terms from a year earlier, indicating a gain in competitiveness.

The FY2018 budget, announced in June 2017, projected that revenue growth at 31.8% would outpace spending growth at 26.2%. Annual development spending was slated to grow by 38.5% to accelerate the implementation of some large infrastructure projects including the Padma Bridge, Dhaka Metro Rail, Rooppur Nuclear Power Plant, Payra Port, and coal-fired power plants at Rampal and Matarbari. Revenue was projected to rise to equal 13.0% of GDP, and public spending 18.0%, both significant increases from the previous year.

The ratio of government debt to GDP has declined slightly over time and is quite low for developing Asia. External debt amounted to 11.4% of GDP in FY2017, reflecting the government's continued preference for concessional external borrowing. Domestic debt amounted to 15.7% of GDP.

Meanwhile, the influx of some one million Rohingya ethnic minority of Myanmar fleeing pogrom perpetrated on them by the Myanmar military junta put a sudden pressure on Bangladesh economy in the late 2017. None other than the UN and many more governments have recognized the incident as a case of "ethnic cleansing", and the international community have been raising their voice to hold the Myanmar government to account for this humanitarian crisis. Bangladeshis have once again shown their kinder gentler side by offering these refugees safety and temporary habitat. They are the responsibility of the UN High Commission for Refugees (UNHCR) which has been actively seeking pledges of aid that is expected to come in drips. Our optimistic assumption is that much of the annual cost of about \$600 million will become available and the refugees will be repatriated within a year. A plausible long-tern solution to the Rohingyas of Rakhine State in Myanmar is the Kofi Anan Commission Report that is on the table with wide international endorsement. In the unlikely event that this becomes a longer-lasting festering problem there could be unpalatable economic and social consequences for Bangladesh to endure.

"Bangladesh has made remarkable progress in achieving inclusive growth, which led to a substantial decline in poverty. The extent of financial inclusion in society is commendable, and the authorities should continue to strengthen the legal and regulatory framework of the banking sector and implement the upcoming financial inclusion strategy. Finally, higher expenditure on education and improvements in rural infrastructure should continue to boost the current low female labour force participation rates by enhancing job prospects, reducing the time spent on domestic tasks, and increasing safety," - a statement of International Monetary Fund (IMF) on the trends of Bangladesh economy in 2017.

Country Outlook

GDP growth is expected to moderate to 7.0% in FY2018 as consumption demand slackens despite a rebound in worker remittances. Remittance beneficiaries are likely to adopt a cautious approach to spending, repaying debt incurred in recent years of remittance declines. Private investment is nevertheless expected to edge up with support from an accommodative credit policy, and public investment will expand as the authorities seek to speed the implementation of infrastructure projects. Export performance is expected to strengthen on projected higher growth in the euro area and the US. However, net exports will not add to growth, as imports are expected to expand strongly with substantial restocking of food grains, rising fuel requirements, and a steady increase in imports of capital goods.

Broadly favorable global growth and trade prospects are expected to continue in FY2019. With a further strengthening of exports and remittances, GDP growth that year is expected to firm to 7.2%. A marked stepping up of budget revenue mobilization could fuel a somewhat stronger advance in investment and therefore growth, but FY2019 budget policies will become known only when announced later.

On the supply side, agriculture growth is expected to moderate to 2.3% in FY2018 from 3.0% last year because it is from a higher base and prolonged flooding again hindered the planting of the wet monsoon rice crop. Industry growth is forecast to pick up slightly to 10.4%, underpinned by higher exports. Expansion in services is likely to slow to 6.4% from 6.7% in the previous year as consumer spending moderates and growth in agriculture income slows.

Inflation is expected to accelerate to average 6.1% in FY2018. Food inflation averaged just over 7% year on year in the first half because of crop losses from the flooding, but it eased from a peak of 7.9% in September 2017 to 7.1% in December with imports of food grains and the arrival in markets of a newly harvested crop. Rice prices will nevertheless remain higher than last year. Nonfood inflation has remained broadly stable, averaging 3.5% in the first half of the year, but is expected to be higher in the second half because of anticipated upward adjustments to natural gas and electricity prices, higher global oil prices, and taka depreciation.

Inflation is projected to edge up to 6.3% in FY2019 because of further increases in natural gas and electricity prices and continued taka depreciation. However, normal weather and projected stability in global oil prices should temper price pressures compared with this year.

The monetary policy statement for the second half of FY2018 (January-June 2018) focuses on monetary and prudential policies to moderate high import growth in the first half toward a sustainable trend and to contain a possible rise in inflationary expectations reflecting higher food and energy prices. The central bank kept the main policy repo rate unchanged at 6.75% and decided to intensively supervise credit flows to ensure their quality and composition appropriate for productive use, rather than resort to broader restrictions on credit. The declining trend in government borrowing from banks allowed the central bank to adjust earlier monetary targets to accommodate slightly higher growth in credit to the private sector, at 16.8% in the second half of FY2018 after overshooting its target in the first half. A likely decline in net foreign assets will keep broad money growth a bit lower than originally projected.

Gratitude

It is the privilege of the Members of the Board of Directors of the Bank, to express appreciation and gratitude to all the valued Shareholders, Clients, Patrons and well-wishers for their continued support and co-operations over the years. The Board is also indebted to the Government of Bangladesh, Bangladesh Bank, BSEC, DSE, CSE, Registrar of Joint Stock Companies and Firms and other related entities for their continued guidance and support throughout this bracing journey of the bank.

The Board would like to place on record their deepest appreciation for the dedicated services rendered by all the employees of the bank.

AB will remain committed to its vision and also towards creation of Shareholders value. Besides, AB will also continue its unfeigned efforts in improving the lot of the common people and accelerating its contribution towards economic and social development of the country.

When an asset's carrying amount is increased as a result of revaluation, the increased amount should be credited directly to equity under the head revaluation surplus/ reserve as per BAS 16 "Property, Plant and Equipment".

Provision for taxation

Income tax represents the sum of the current tax and deferred tax.

For the year ended 31 December 2017

Current Tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Bank's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

Provision for current income tax has been made @ 40% on the accounting profit made by the Bank after considering taxable allowances and disallowances as per income tax laws applicable for the Bank.

Deferred Tax

Deferred tax is recognised on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and are accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences, unused tax losses or unused tax credits can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and associates, and interests in joint ventures, except where the Bank is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised, based on tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax is charged or credited to the income statement, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the company intends to settle its current tax assets and liabilities on a net basis.

The impact on the account of changes in the deferred tax assets and liabilities has also been recognized in the Profit and Loss Account as per BAS-12 "Income Taxes" (note 10.1).

As a financial intermediary, the Bank is exposed to various types of risks. Risk is defined as uncertainties resulting in adverse variation of profitability or in losses, financial or otherwise. The risk management of the Bank covers core risk areas of banking as defined by Bangladesh Bank and Pillar-2 risk as well. The core risks are credit risk, asset liability risks, money laundering risks, internal control and compliance risks, information technology risks and foreign exchange risks. Some other risks those also affect banking business are liquidity risk, market risk interest rate risk, equity risk, operational risk, reputation risk, strategic risks, credit concentration risks, environmental and climate change risks etc.

The objective of the risk management framework at the bank is that the Bank understands, evaluates and takes well calculative risks and thereby safeguarding the Bank's capital, its financial resources and profitability from various business risks through its own measures, policies and procedures established to address these risks and also implementing Bangladesh Bank's guidelines and following some of the best practices as under:

Credit risk

It arises mainly from lending, trade finance and treasury businesses. This can be described as potential loss arising from the failure of a counter party to perform as per contractual agreement with the Bank. The failure may result from unwillingness of the counter party or decline in his/ her financial condition. Therefore, the Bank's credit risk management activities have been designed to address all these issues.

The Bank has segregated duties of the officers / executives involved in credit related activities. A separate Department has been formed at Head Office which is entrusted with the duties of maintaining effective relationship with the customers, marketing of credit products, exploring new business opportunities, etc. Moreover, credit approval, administration, monitoring and recovery functions have been segregated. For this purpose, two separate divisions have been formed within the Credit Department.

These are (a) Credit Risk Management Division and (b) Credit Administration Division. Credit Risk Management Division is entrusted with the duties of maintaining asset quality, assessing risk in lending to a particular customer, sanctioning credit, formulating policy / strategy for lending operation, etc. Adequate provision has been made on classified loans / investments. A thorough assessment is done before sanction of any credit facility at Credit Risk Management Division. The risk assessment includes borrower risk analysis, financial analysis, industry analysis, historical performance of the customer, security of the proposed credit facility, etc. The assessment process starts at Corporate Division by the Relationship Manager / Officer and ends at Credit Risk Management Division when it is approved / declined by the competent authority. Credit approval authority has been delegated to the credit committee. In determining single borrower / large loan limit, the instructions of Bangladesh Bank are strictly followed. Internal audit is conducted at periodical intervals to ensure compliance of Bank's and Regulatory polices. Loans are classified as per Bangladesh Bank's guidelines.

Market risk

The exposure of market risk of the Bank is restricted to foreign exchange risk, interest rate risk and equity position risk.

Foreign exchange risk

Foreign exchange risk is defined as the potential change in earnings due to change in market prices. The foreign exchange risk of the Bank is minimal as all the transactions are carried out on behalf of the customers against underlying L/C commitments and other remittance requirements. Financial Institution and Treasury (FIT) Division independently conducted the foreign exchange transactions and the Mid office and the Back office of Treasury is responsible for verification of the deals and passing of their entries in the books of account. All foreign exchange transactions are revalued at Market rate as determined by Bangladesh Bank at the month end. All nostro accounts are reconciled on a monthly basis and outstanding entry is reviewed by the management for its settlement. The position maintained by the Bank at the end of day was within the stipulated limit prescribed by the Bangladesh Bank.

Interest rate risk

Interest rate risk may arise from trading portfolio and non-trading portfolio. The trading portfolio of the bank consists of government treasury bills, bond, etc. The short term movement in interest rate is negligible or nil. Interest rate risk of non-trading business arises from mismatches between the future yield of an asset and its funding cost. Asset Liability Committee (ALCO) monitors the interest rate movement on a regular basis.

Equity risk

Equity risk arises from movement in market value of equities held. The risks are monitored by the Investment Banking Division under a well-designed policy framework. Adequate provision was maintained by the Bank for diminution of market value of Investments.

Liquidity risk

The objective of liquidity risk management is to ensure that all foreseeable funding commitments and deposit withdrawals can be met when due. To this end, the Bank is maintaining a diversified and stable funding base comprising of core retail and corporate deposits and institutional balance. Management of liquidity and funding is carried out by Financial Institution and Treasury (FIT) Division under approved guidelines. FIT front office is supported by a very structured Mid Office and Back Office. The liquidity management is monitored by Asset Liability Committee (ALCO) on a regular basis. A written contingency plan is in place to manage extreme situation.

Annexure-E-1

These disclosures have been made in accordance with the Bangladesh Bank BRPD Circular no. 18 dated 21 December 2014 as to guidelines on 'Risk Based Capital Adequacy for Banks' in line with Basel III.

1. Capital adequacy under Basel-III

To cope with the international best practices and to make the Bank's capital more risk sensitive as well as more shock resilient, 'Guidelines on Risk Based Capital Adequacy (RBCA) for Banks' (revised regulatory capital framework in line with Basel III) have been introduced from 01 January 2015. The guidelines were issued by Bangladesh Bank (BB) under section 13 and section 45 of the Bank Company Act, 1991 (amendment up to 2018).

Basel III guidelines are structured on the following aspects:

- Minimum capital requirements to be maintained by a Bank against credit, market, and operational risks.
- b) Process for assessing the overall capital adequacy aligned with risk profile of a Bank as well as capital growth plan.
- c) Framework of public disclosure on the position of a Bank's risk profiles, capital adequacy, and risk management system.

2. Scope of application

Basel III quidelines apply to all scheduled banks on 'Solo' basis as well as on 'Consolidated' basis where-

- Solo Basis refers to all position of the Bank and its local and overseas branches/offices; and
- Consolidated basis refers to all position of the bank (including its local and overseas branches/offices) and its subsidiary company(ies) engaged in financial (excluding insurance) activities like Merchant banks, Brokerage Firms, Discount Houses, etc. (if any).

AB Bank followed the scope narrated above. Bank has Tier 1 capital (going concern) and Tier 2 capital (gone concern) structure at the moment.

3. Capital base

Regulatory capital has been categorised into following way:

- 1) Tier 1 capital (going concern capital)
 - a) Common equity Tier I
 - b) Additional Tier I
- 2) Tier 2 capital (gone concern)

1. (a) Common Equity Tier 1 Capital

For the local Banks, Common Equity Tier 1 (CET1) capital shall consist of sum of the following items:

- a) Paid up capital
- b) Non repayable share premium account
- c) Statutory reserve
- d) General reserve
- e) Retained earnings
- f) Dividend equalization reserve
- g) Noncontrolling interest in subsidiaries

Less: Regulatory adjustments applicable on CET1

Based on 31 December 2017

Annexure-E-1

1. (b) Additional Tier 1 Capital

For the local Banks, Additional Tier 1 (AT1) capital shall consist of the following items:

- Instruments issued by the banks that meet the qualifying criteria for AT1 as specified at Annex 4.
- b) Noncontrolling Interest i.e. AT1 issued by consolidated subsidiaries to third parties (for consolidated reporting only);

Less: Regulatory adjustments applicable on AT1 Capital

2. Tier 2 Capital

Tier 2 capital, also called 'gone-concern capital', represents other elements which fall short of some of the characteristics of the core capital but contribute to the overall strength of a bank. For the local banks, Tier 2 capital shall consist of the following items:

- a) General provisions
- b) Subordinated debt / Instruments issued by the Banks that meet the qualifying criteria for Tier 2 capital;
- c) Noncontrolling Interest i.e. Tier 2 capital issued by consolidated subsidiaries to third parties as specified

Less: Regulatory adjustments applicable on Tier 2 capital;

4. Limits (Minima and Maxima)

These instructions will be adopted in a phased manner starting from the January 2015, with full implementation of capital ratios from the beginning of 2019. Banks will be required to maintain the following ratios on an ongoing basis:

- a) Common equity Tier 1 of at least 4.5% of the total RWA.
- b) Tier 1 capital will be at least 6.0% of the total RWA.
- c) Minimum CRAR of 10% of the total RWA.
- d) Additional Tier 1 capital can be admitted maximum up to 1.5% of the total RWA or 33.33% of CET1, whichever is higher
- e) Tier 2 capital can be admitted maximum up to 4.0% of the total RWA or 88.89% of CET1, whichever is higher
- f) In addition to minimum CRAR, Capital Conservation Buffer (CCB) of 2.5% of the total RWA is being introduced which will be maintained in the form of CET1.

Following is the phase-in arrangement for the implementation of minimum capital requirements

Annexure-E-1

5. Capital conservation buffer

Banks are required to maintain a capital conservation buffer of 2.5%, comprised of Common Equity Tier 1 capital, above the regulatory minimum capital requirement of 10%. Banks should not distribute capital (i.e. pay dividends or bonuses in any form) in case capital level falls within this range. However, they will be able to conduct business as normal when their capital levels fall into the conservation range as they experience losses. Therefore, the constraints imposed are related to the distributions only and are not related to the operations of banks. The distribution constraints imposed on Banks when their capital levels fall into the range increase as the Banks' capital levels approach the minimum requirements. The table below shows the minimum capital conservation ratios a Bank must meet at various levels of the Common Equity Tier 1 capital ratios.

Bank's minimum capital conservation standards

CET-1 ratio	Minimum capital conservation ratio (expressed as percentage of earnings)
4.5% - 5.125%	100%
>5.125% - 5.75%	80%

6. Regulatory adjustments / deductions

In order to arrive at the eligible regulatory capital for the purpose of calculating CRAR, Banks are required to make the following deductions from CET1/capital:

Shortfall in provisions against NPLs and investments

Goodwill and all other intangible assets

Deferred tax assets (DTA)

Defined benefit pension fund assets

Gain on sale related to securitisation transactions

Investment in own shares

Investments in the capital of Banking, Financial and Insurance entities

(Reciprocal crossholdings in the Capital of Banking, Financial and Insurance entities)

Transitional arrangements for capital deductions

Currently, 10% of revaluation reserves for equity instruments and 50% of revaluation reserves for fixed assets and securities are eligible for Tier 2 capital. However, Bangladesh Bank, in the light of Basel III proposals, has harmonised deductions from capital which will mostly be applied at the level of Tier 2. The regulatory capital adjustment will start in a phased manner from January 2015 in the following manner:

Transitional Arrangements for Capital Deductions:

Phase-in of deductions from Tier 2	2015	2016	2017	2018	2019
RR for Fixed Assets	20%	40%	60%	80%	100%
RR for Securities	20%	40%	60%	80%	100%
RR for Equity Securities	20%	40%	60%	80%	100%

Bank complied with the conditions as embodied in this respect wherever applicable.

7. Leverage Ratio

A minimum Tier 1 leverage ratio of 3% is being prescribed both at solo and consolidated level
The banks will maintain leverage ratio on quarterly basis. The calculation at the end of each calendar quarter will
be submitted to BB showing the average of the month end leverage ratios based on the following definition of
capital and total exposure.

 $\mbox{Leverage Ratio} = \frac{\mbox{Tier 1 Capital (after related deductions)}}{\mbox{Total Exposure (after related deductions)}}$

Transitional arrangements

The parallel run period for leverage ratio will commence from January, 2015 and run until December 31, 2017. During this period, the leverage ratio and its components will be tracked to assess whether the design and calibration of the minimum Tier 1 leverage ratio of 3% is appropriate over a credit cycle and for different types of business models, including its behavior relative to the risk based requirements.

Bank level disclosure of the leverage ratio and its components will start from 01 January 2015. However, Banks should report their Tier 1 leverage ratio to the BB (Department of Off-Site Supervision) along with CRAR report from the quarter ending March, 2015. Based on the results of the parallel run period, any final adjustments to the definition and calibration of the leverage ratio will be made by BB in 2017, with a view to setting the leverage ratio requirements as a separate capital standard from 01 January 2018.

Bank complied with the conditions as embodied in this respect wherever applicable.

8. a) Credit Risk

Credit risk is the potential that a bank borrower or counterparty fails to meet its obligation in accordance with agreed term.

Bank followed the suggested methodology, process as contained in the guidelines.

b) Methodology

Bangladesh Bank adopted Standardised approach for calculating Risk Weighted Assets. The capital requirement for credit risk is based on the risk assessment made by external credit assessment institutions (ECAIs) recognized by BB for capital adequacy purposes. Banks are required to assign a risk weight to all their on balance sheet and off balance sheet exposures. Risk weights are based on external credit rating (solicited) which was mapped with the BB rating grade or a fixed weight that is specified by Bangladesh Bank

C) Credit risk mitigation

AB Bank uses a number of techniques to reduce its credit risk to which the Bank is exposed. For example, exposures may be collateralised by first priority claims, in whole as in part with cash or securities, a loan exposure may be guaranteed by a third party. Additionally, Bank may agree to net loans owed to them against deposits from the same counterparty.

Bank uses comprehensive approach as adopted by the Central Bank. In this approach when taking collateral, Bank will need to calculate adjusted exposure to a counterparty for capital adequacy purposes in order to take account of the effects of that collateral. Using haircut, Bank is required to adjust both the amount of the exposure to the counterparty and the value of any collateral received in support of that counterparty to take account of possible future fluctuations in the value of either, occasioned by market movements. This will produce volatility adjusted amounts for both exposure and collateral.

Annexure-E-1

9. a) Market Risk

Market risk is defined as the risk of losses in on and off-balance sheet positions arising from movements in market prices. The market risk positions subject to this requirement are:

- i) The risks pertaining to interest rate related instruments and equities in the trading book; and
- ii) Foreign exchange risk and commodities risk throughout the Bank (both in the Banking and in the trading book).

b) Methodology

In Standardized Approach, the capital requirement for various market risks (interest rate risk, equity price risk, commodity price risk, and foreign exchange risk) is determined separately. The total capital requirement in respect of market risk is the sum of capital requirement calculated for each of these market risk sub-categories. The methodology to calculate capital requirement under Standardized Approach for each of these market risk categories is as follows:

- a) Capital Charge for Interest Rate Risk = Capital Charge for Specific Risk + Capital Charge for General Market Risk.
- b) Capital Charge for Equity Position Risk = Capital Charge for Specific Risk + Capital Charge for General Market Risk.
- c) Capital Charge for Foreign Exchange Risk = Capital Charge for General Market Risk
- d) Capital Charge for Commodity Position Risk = Capital Charge for General Market Risk

Bank followed the suggested methodology, process as contained in the Guidelines.

10. a) Operational risk

Operational risk is defined as the risk of losses resulting from inadequate or failed internal processes, people and systems or from external events. This definition includes legal risk, but excludes strategic and reputation risk.

b) Measurement methodology

Banks operating in Bangladesh shall compute the capital requirements for operational risk under the Basic Indicator Approach (BIA). Under BIA, the capital charge for operational risk is a fixed percentage, denoted by (alpha), of average positive annual gross income of the bank over the past three years. Figures for any year in which annual gross income is negative or zero, should be excluded from both the numerator and denominator when calculating the average.

Bank followed the suggested methodology, process as contained in the guidelines.

F) Interest Rate Risk in the Banking Book (IRRBB)

Qualitative disclosure

(a) The general qualitative disclosure requirement including the nature of IRRBB and key assumptions, including assumptions regarding loan prepayments and behavior of non-maturity deposits, and frequency of IRRBB measurement.

Interest rate risk is the potential that the value of the On Balance Sheet and the Off Balance Sheet position of the Bank would be negatively effected with the change in the interest rate. The vulnerability of an institution towards the advance movement of the interest rate can be gauged by using duration GAP under Stress Testing Analysis.

AB Bank has also been exercising the Stress Testing using the duration GAP for measuring the Interest Rate Risk on its On Balance Sheet exposure for estimating the impact of the net change in the market value of equity on the Capital Adequacy Ratio (CAR) due to change in interest rates only on its On Balance Sheet position (as the Bank holds no interest bearing Off Balance Sheet positions and or Derivatives). Under the assumption of three different interest rate changes i.e. 1%, 2% and 3%.

(b) The increase (decline) in earnings or economic value (or relevant measure used by management) for upward and downward rate shocks according to management's method for measuring IRRBB, broken down by currency (as relevant).

I) Liquidity Ratio

(a)	>	Views of BOD on system to reduce liquidity Risk	Liquidity risk is the potential for loss to the bank arising from either its inability to meet its obligations of depositors as they fall due or to fund in increased assets as per commitment.
			To mitigate liquidity risk Bank asses its risk appetite and manage the risk within a structured frame work. Professional resources are deployed to set the limits and procedures and get them approved by the Board.
			To reduce the liquidity Risk in a structured way, Bank monitors various indicators like regulatory indicators (CRR, SLR, MTFR, MCO, ADR, LCR, NSFR) and uses internal monitoring tools (WBG, CLP and MAT)
	>	Methods used to measure Liquidity risk	Liquidity measurement involves forecasting the Bank's cash inflows against its outflows to identify the potential for any net shortfalls going forward. For measuring Bank uses some simple techniques as mentioned below:
			> Bank prepares Structural Liquidity Profile (SLP) on monthly basis. SLP is used to estimate the Bank's cash inflows and outflows and thus net deficit or surplus (GAP) over a series of specified time periods. Bank focuses on the maturity of its assets and liabilities in different tenors. Excessive longer tenor lending against shorter-term borrowing is monitored as this can put the Bank's balance sheet in a very critical and risky position.

Based on 31 December 2017

	Bank has a Contingency Funding Plan (CFP) in place. Contingency Funding Plan (CFP)is a set of policies and procedures that serves as a blueprint for the Bank to meet its funding needs in a timely manner and at a reasonable cost. Bank maintains sufficient high quality liquid assets to meet the liquidity crisis period.	
	> Bank estimates the funding requirement both is normal and stress conditions arising from on and off balance sheet exposures. Bank monitors its products which are interest rate sensitive. Those are taken care of at the time of interest rate movement in the market based on behavior of clients and other competitors.	
	> Bank monitors liability concentration level. Highly concentrated deposits means bank is relying on too few providers or funding sources. Bank has to be ready for arranging fund if concentrated deposits are withdrawn at a time or Bank place this fund for short term lending.	
	> Bank uses variety of ratios to quantify the liquidity and interpret them taking into account the qualitative factors.	
> Liquidity risk management system	The Management of the Bank measures the liquidity risk and manage them under the Board approved guidelines and policies. Bank prepares extensive reports for monitoring the balance sheet movement on daily basis. Bank also monitors the market information of the country and global market. Bank has an Asset Liability Committee (ALCO). ALCO is a senior management level committee responsible for supervision and management of liquidity and other risks using different monitoring tools. They monitor the limit for indicators set by Bangladesh Bank as well as Bank's Board.	
	Key elements of an effective liquidity risk management process include an efficient MIS to measure, monitor and control existing as well as future liquidity risks and reporting them to senior management and the Board. Bank is therefore working for continuous improvement of MIS.	
> Policies and processes for mitigating liquidity risk	Bank has set of policies duly approved by the Board for mitigating liquidity risk. These policies are supported by effective procedures to measure, achieve and maintain liquidity. The ALCO recommends the policies for liquidity risk which is reviewed and approved by the Board.

Opinion

We have audited the financial statements of **AB Securities Limited** which comprise the Statement of Financial Position as at December 31, 2017, and the Statement of Profit or Loss and Other Comprehensive Income, Statement of Cash Flows and Statement of Changes in Equity for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In the forming of our opinion on the financial statements, which is not qualified, we have considered the adequacy of the disclosure made in Note-5.00 to the financial statements concerning the issuance of Stock Dividend.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the company as at December 31, 2017, and of its financial performance and its cash flows for the year then ended in accordance with Bangladesh Financial Reporting Standards (BFRSs).

Basis for Opinion

We conducted our audit in accordance with Bangladesh Standards on Auditing (BSAs.) Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report.

We are independent of the Company in accordance with the International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Bangladesh, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Information Other than the Financial Statements and Auditor's Report Thereon

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If based on the work we have preformed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with BFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with BSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably expected to influence the economic decisions of users taken on the basis of these financial statements.

Independent Auditor's Report to the Members of AB International Finance Limited

(incorporated in Hong Kong with limited liability)

We have audited the financial statements of AB International Finance Limited ("the Company") set out on pages 6 to 18, which comprise the statement of financial position as at 31st December, 2017, and the statement of income and retained earnings and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements give a true and fair view of the financial position of the Company as at 31st December, 2017, and of its financial performance and its cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standard for Private Entities ("HKFRS for Private Entities") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and have been properly prepared in compliance with the Hong Kong Companies Ordinance.

Basis for Opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the HKICPA's Code of Ethics for Professional Accountants ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information Other than the Financial Statements and Auditor's Report Thereon

The directors are responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Directors and Those Charged with Governance for the Financial Statements

The directors are responsible for the preparation of the financial statements that give a true and fair view in accordance with HKFRS for Private Entities issued by the HKICPA and the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Our report is made solely to you, as a body, in accordance with Section 405 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
