**Coupon Range**
- Coupon Ceiling: 10%
- Coupon Floor: 6% subject to having available distributable profit

As approved by Bangladesh Bank

**Coupon Discretion**

1. The bank will have full discretion at all times to cancel distributions/payments to the bondholder;
2. Cancellation of discretionary payments must not be an event of default;
3. Banks must have full access to cancelled payments to meet obligations as they fall due;
4. Cancellation of distributions/payments must not impose restrictions on the bank except in relation to distributions to common stakeholders; and
5. Dividends must be paid out of distributable items;
6. The dividend shall not be cumulative; i.e., dividend missed in a year will not be paid in future years, even if adequate profit is available and the level of CRAR conforms to the regulatory minimum. When dividend is paid at a rate lesser than the prescribed rate, the unpaid amount will not be paid in future years, even if adequate profit is available and the level of CRAR conforms to the regulatory minimum.
7. The instrument cannot have a credit sensitive coupon feature, i.e. a dividend that is reset periodically based in whole or in part on the banks’ credit standing. For this purpose, any reference rate including a broad index which is sensitive to changes to the bank’s own creditworthiness and/or to changes in the credit worthiness of the wider banking sector will be treated as a credit sensitive reference rate. Banks desirous of offering floating reference rate may take prior approval of the BB as regard permissibility of such reference rates.
8. In general, it may be in order for banks to have dividend stopper arrangement that stop dividend payments on common shares in the event the holders of Additional Tier 1 instruments are not paid dividend/coupon. However, dividend stoppers must not impede the full discretion that bank must have at all times to cancel distributions/payments on the Additional Tier 1 instrument, nor must they act in a way that could hinder the re-capitalization of the bank. For example, it would not be permitted for a stopper on an Additional Tier 1 instrument to:
   - attempt to stop payment on another instrument where the payments on this other instrument were not also fully discretionary;
   - prevent distributions to shareholders for a period that extends beyond the point in time that dividends/coupons on the Additional Tier 1 instrument are resumed;
   - impede the normal operation of the bank or any restructuring activity (including acquisitions or disposals).
| **Exercise of Coupon Discretion** | A stopper may act to prohibit actions that are equivalent to the payment of a dividend, such as the bank undertaking discretionary share buybacks, if otherwise permitted. |
| **Coupon Payment Frequency** | Semi-Annual |
| **Late Payment** | Issuer shall pay a late payment penalty on the basis of 2% (two per cent) higher than the Coupon Rate and be payable on the amount not paid on the due date till the date of actual payment unless exercise of coupon discretion is not in effect. |
| **Business Day Convention/Effect of Holidays** | • If any Coupon/Interest Payment Date falls on a day that is not a Business Day, the payment shall be made by the Bank on the immediately succeeding Business Day.  
  • If the Call Option Due Date (also being the last Coupon Payment Date, in case Call Option is exercised) of the Bonds falls on a day that is not a Business Day, the Call Option Price shall be paid by the Bank on the immediately preceding Business Day along with interest accrued on the Bonds until but excluding the date of such payment. |
| **Early Redemption or Late Redemption** | Not Applicable. Since the instrument is perpetual in nature i.e., there is no maturity date; late redemption is not applicable unless and until it is eligible for call option criteria. |
| **Put Date** | Not Applicable |
| **Put Price** | Not Applicable |
| **Call Option** | Can be exercised only after ten years of issuance, with prior approval from the Bangladesh Bank. |
| **Call Option Eligibility** | 1. Replace this instrument with capital of the same or better quality that are sustainable for the income capacity of the Bank; or,  
2. Capital position is above the minimum requirements after the call option is exercised. |
| **Claim Settlement in the event of Liquidation or Wind-up** | Claims of the investors on the bond are:  
1. Superior to the claims of investors in equity shares and perpetual non-cumulative preference shares, if any, of the bank whether currently outstanding or issued at any time in the future.  
2. subordinated to the claims of depositors, general creditors and subordinated debt of the Bank other than any subordinated debt qualifying as Additional Tier I Capital (as defined in the Basel III Guidelines) of the Bank;  
3. Is neither secured nor covered by a guarantee of the issuer nor related entity or other arrangement that legally or economically enhances the seniority of the claim vis-à-vis bank creditors |
| **Loss Absorption** | Notwithstanding anything to the contrary stipulated herein, the claims of the Bondholders shall be subject to the provisions of Loss Absorption in this terms and features. |
| **As per the direction of Bangladesh Bank and BASEL III guidelines, the Bonds are subject to principal loss absorption through conversion to common shares at an objective pre-specified trigger point as required of Additional Tier I instruments.** |
| Trigger Point for Loss Absorption | If a Pre-Specified Trigger Level (as described below) occurs the Bank shall:
1. notify the Trustee;
2. cancel any coupon which is accrued and unpaid to as on the conversion date; and
3. without the need for the consent of Bondholders or the Trustee, convert the outstanding principal of the Bonds by such amount as the Issuer may in its absolute discretion decide subject to the amount of conversion not exceeding the amount which would be required to bring the consolidated Common Equity Tier 1 (CET 1) ratio to 4.5% of RWA.

CET-1 on Trigger Date will be considered to identify the shortfall percentage and it will be converted into common shares eventually. If a fractional share issuance arises upon conversion, the issuer will round the number of shares issuable, up to the next whole number. Fractional lot size will also be rounded to the next whole number. |
